Universal Eagles for Security Service Ltd

ABOUT COMPANY

Universal Eagles for Security Services (UESS) is a company established in 2011, that specializes in providing distinctive and comprehensive security and safety services to a wide range of local and international organizations operating in Yemen. It excels in providing professional safety and property security installations, maritime protection, protected vehicles, security consultancy, guard training, installation of high-tech surveillance systems and the provision of customized armed-escort services (stationary & mobile) with a commitment to reliability, quality and professionalism.

UESS is a privately owned company as well as part of a prestigious company, Universal Group, registered in Yemen and certified to operate in different regions across the country with high skill and capacity. The company's team encompasses qualified personnel with professional expertise and diverse security backgrounds, a unique feature that is well employed to devise realistic, cost-effective and risk management solutions.

By becoming the fastest-growing company in the group, UESS has succeeded in a very short time in handling all security responsibilities of major establishments and organizations in Yemen and strives to maintain its reputation as the paramount security-service provider in the country.

VISION

UESS

يونيفرسال إيجلز للخدمات الأمنية المحدودة
Universal Eagles for Security Service Ltd

- To ensure that each member of our staff is ultimately responsible for the safety and security of our clients.
- To increase the understanding of the risk environment of our clients and develop a set of measures to mitigate those risks.
- To ultimately increase our ability to bring about positive and lasting change in terms of the security approach.
- To lead the private security industry by means of creating a secure and safe working environment in a collective sense of awareness and responsibility.

Radeio Room Center

Our Operation Room is where our distinction and uniqueness exist; it is where your life and business are 27/4 in safe hands. It is where our highly skilled and trained staff meets advanced technology to deliver the best security services and solutions, where we take our high experience, knowledge, and skills and combine that with the highest standards of technology to quickly and efficiently manage your security needs. Here we offer both orientation and support.

Here where errors and violations of the rules, regardless of position or function within our company must be actively addressed, and must not be ignored or even tolerated... on this basis, we as the management— representing each and every employee within our company — are clearly and unambiguously committed to these principles. Whether management or staff — together we take responsibility for the UESS.

Our operating room center works 24/7 to receive telephone calls, reports, and complaints in the various incidents around the clock and transmit them and work to support during the event and contact the relevant authorities and follow up on the results and receive alerts via news, and notifications to take the necessary action. One building block of the success of our company is that all employees — no matter if management or staff members— act with honesty, integrity and in an ethical manner.

SECURITY TECHNOLOGY SERVICES

Fire Alarm System

Fire alarm systems are one of the most important ways that work to notify us of the presence of fires. Fire Alarm System is designed to alert us to an emergency so that we can take action to protect our staff, the public, and ourselves. Fire alarms are found in offices, factories, and public buildings, they are a part of our everyday routine but are often overlooked until there is an emergency. Therefore, We at UESS work to have all solutions to protect lives and properties.

Whatever the method of detection is, if the alarm is triggered, sounders will operate to warn people in the building that there may be a fire and to evacuate. The fire alarm system may also incorporate a remote signal system, which could then alert the fire brigade via a central station.
